Your Works Cited page should have a 1-inch margin. The text should be Times New Roman. The font size should be 12 pt. Double space all citations but do not skip lines between entries. The second and subsequent lines of each entry should be indented 0.5 inches. This is called a hanging indent. All entries should be alphabetized by the first letter of each entry.

How to do a "hanging indent" and double space your citations

Type your bibliographic information in alphabetic order – only hit "ENTER" at the end of each citation. After you have typed your entire bibliography, follow these steps:

1. Highlight citations
2. On "home" screen, go to "Paragraph"
3. Indentation -> Special -> Hanging
4. Line Spacing ->Double
5. Click Ok

Need a citation that isn't listed? Visit citationmachine.net or the Purdue Online Writing Lab.

Adding a Works Cited Slide to Your Animoto

It's easy to add a Works Cited page to your Animoto. Below are the steps to save your citation page as a jpg file. You will then upload the picture to your Animoto project.

1. Create your Works Cited page in Word.

2. Open a blank document in Word. (It is helpful if you close all the windows on your desktop except for the two Word documents.)

3. While in the blank document, click the Insert tab and then click the Screenshot tab. Your Works Cited page should show in the Available Window section. Click on the Screen Clipping tab.

4. When the transparent page appears, use the textbox drawing tool (+) to draw a box around the text on the page.

5. If you did it correctly, your page should display your citation information in a textbox.

6. With your mouse, right click on the text box and save it as a picture. Name it and save it as a jpg file in your Animoto folder.

7. Log in to your Animoto project. Click Add pics & vids and then Upload Pictures & Video. Locate your citation picture and upload it to your Animoto video. Your citation slide should be the final slide in your project.
