Title I Reading

Book Picks

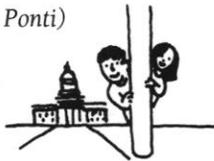

■ *Crazy About Cats* (Owen Davey)

From wild cats like ocelots and pumas to house cats, this nonfiction book from the About Animals series teaches readers all about cats. Your child will discover where cats live, what they eat, and the special features they have. (Also available in Spanish.)

■ *Framed!* (James Ponti)

Twelve-year-old Florian Bates is no ordinary middle schooler. When his family moves to Washington, DC, he starts his own spy agency with the help of his new friend Margaret. Follow along in this spy adventure as the young sleuths help the FBI solve a big case.

■ *The House That Lou Built* (Mae Respicio)

Lou loves her woodshop class, and for a school project, she's planning to build her own tiny house on a piece of land she's inherited. But she quickly realizes that building a new structure isn't as simple as it seems. Determined, Lou finds creative solutions to the many roadblocks she faces along the way.

■ *Go Figure! Big Questions About Numbers* (Johnny Ball)

Your youngster can learn about ancient numbers, explore "magic" numbers, and imagine a newspaper with no numbers in this nonfiction book. He'll also see how numbers are used in all aspects of life. Includes quiz questions and answers.

Strategies for a new year

As your youngster reads more complex stories and textbooks, she'll need new strategies for understanding and remembering new material. Help her start the year off right with these activities.

Fill a "thinking cap"

When your child needs to tackle a challenging chapter, have her get a baseball cap. Each time she finds a new fact or unfamiliar word, she can write it on a slip of paper and put the slip in the hat. After she finishes reading, she should reread everything in her thinking cap and look up definitions of words she doesn't know. Writing and reviewing the information will help her learn it.

Draw a comic strip

Suggest that your youngster create a comic strip about what she's studying (stick figures are okay!). Say she's reading about the water cycle in her science book. She could draw one panel with a character boiling a pot of water and explaining evaporation, and another panel with someone walking in the rain

and talking about precipitation. This is a fun way for her to visualize the material.

Take a "commercial break"

Your child can pretend there's a commercial break at the end of each chapter in a novel she's reading. Her job is to write a "teaser"—a question to encourage the audience to stay tuned. If she's reading *Bunnicula* (Deborah and James Howe), she might write, "Will Bunnicula get caught in the vegetable garden?" Then, have her predict the answer. Asking questions and checking predictions let her monitor how well she understands a story. ■

Fact or opinion?

"It's the best toothpaste for your family!" When your child reads a sentence like this in an advertisement, does he understand that it's an opinion? Distinguishing fact from opinion is an important reading skill. Suggest that he ask himself these questions to tell the difference:

- "Would most people agree?" A fact is true regardless of who wrote it ("Trees are plants"), while an opinion reflects the writer's feelings or beliefs ("Trees shouldn't be cut down").
- "Does it rely on adjectives?" Descriptive words ("Apple pie with ice cream is the perfect dessert") frequently indicate opinions, while facts are more likely to stand alone ("Apples are harvested in autumn"). ■
